> ❝ *DHHS of Victoria State increases its migration project output by 50% by using Caristix solutions to read, compare specs, edit and test HL7 messages* ❞

Dianne Linnell
is Integration Architecture & Development Manager at the DHHS (Department of Health and Human Services) of Victoria State in Australia

To fulfil the needs of her migration project, Dianne conducted an online research to evaluate potential solutions. After identifying Caristix as a contender, she received great feedback from Queensland Health Department, whom had also used the Caristix solution. Dianne went ahead and trialled Caristix.

"Thanks to the ongoing support received by Caristix's Customer Success team", Dianne came to a conclusion: Caristix was the right solution for her organisation to meet activity milestones and ultimately, the December project deadline.

The Caristix tools became essential in helping Dianne **read, compare specifications, edit and test HL7 messages.** Caristix helped focus on the gaps that mattered to Victoria state, resulting in an **increased output of 50%**. An added bonus to the project team has been the ability to easily produce and share documentation of those gaps.

Today, Dianne continues her mission of serving the IT needs the Department of Health and Human Services, helping over 6 million Australians have access to world class healthcare in one of the world's southernmost regions.
